📍 Lahore, Pakistan

I am an experienced Frontend developer with a solid background in Software house environments, having accrued 1.5 years of industry experience. I am now seeking to join a dynamic team where I can further harness my skills and capabilities. My goal is to contribute to challenging projects that allow me to expand my knowledge and expertise, with the ultimate aim of becoming a valuable long-term asset to the company.

EXPERIENCE

Business Solutions & Services (B S S)
ReactJS Developer

01/2022 - present.

- Developed the Createsmart application from scratch using ReactJS, Redux, HTML5, CSS3, and JavaScript.
- Experience designing user interfaces using Figma.
- Familiarity with Node.js, Express, and MongoDB.
- Adding functionality to the front end.
- Experience working with Git and agile methodologies.
- Integrating REST API using Fetch, Axios with Redux Thunk.
- Actively participated in code reviews, debugging, and troubleshooting to maintain high code quality and identify areas for improvement.
- Demonstrated strong problem-solving skills and attention to detail in debugging and troubleshooting issues.
- Helped in the UI of an ongoing react native project.
